

Change Internet Options to View PVMSEC Employment Tools Page

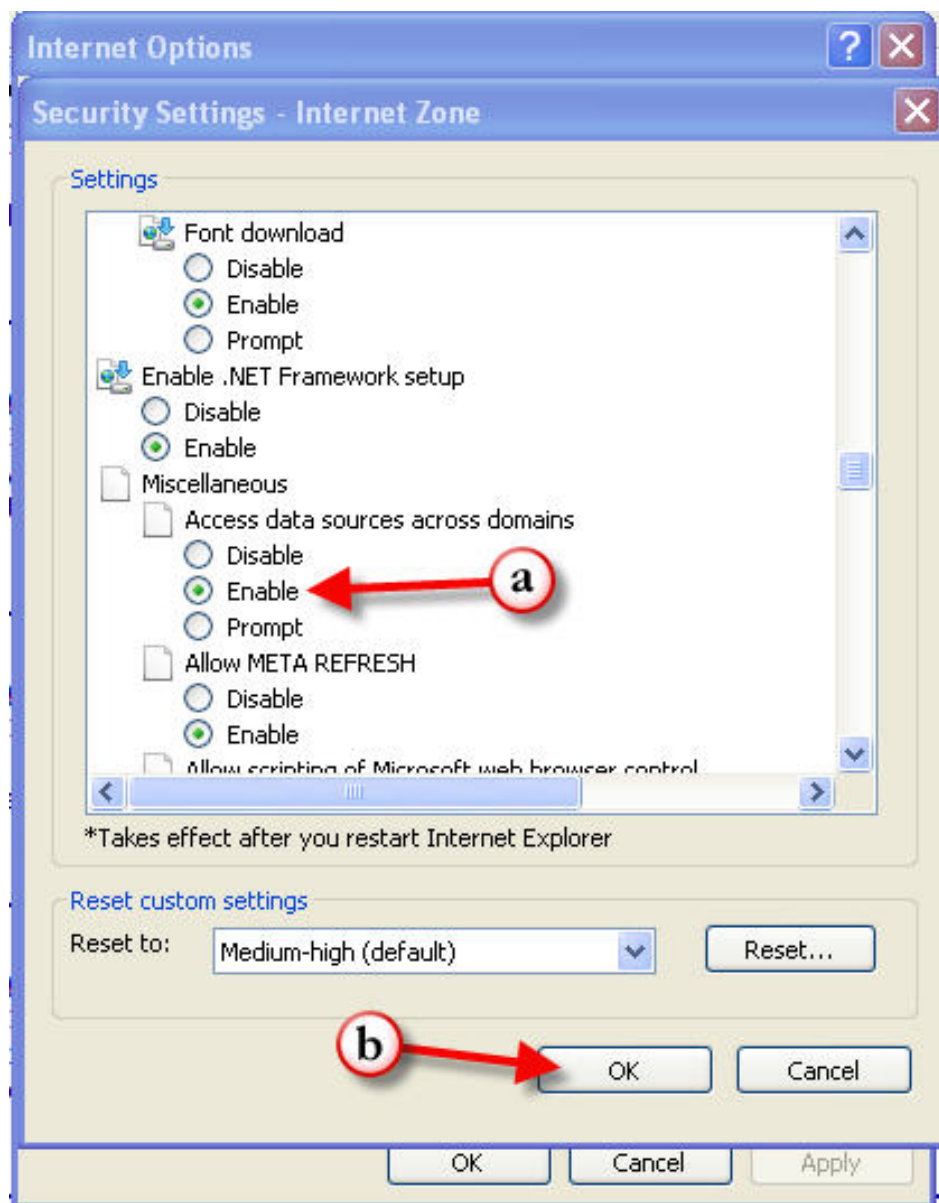

Follow the instructions below to change your Internet Security Options so you can view the 20 most recent job openings in the Philadelphia area that are displayed in our Employment Tools section of our website.

Please note: Changing this setting will **NOT** cause any security problems with your computer.

1. Click the **Tools Menu** on **Internet Explorer** and then click **Internet Options** in the menu to open the *Internet Options dialog box*.
 - a. Click the **Security** tab at the top of the dialog box
 - b. Make sure that the **Internet** zone is selected (*if not just click it once to select it*)
 - c. Click the **Custom level** button to open the *Security Settings dialog box*

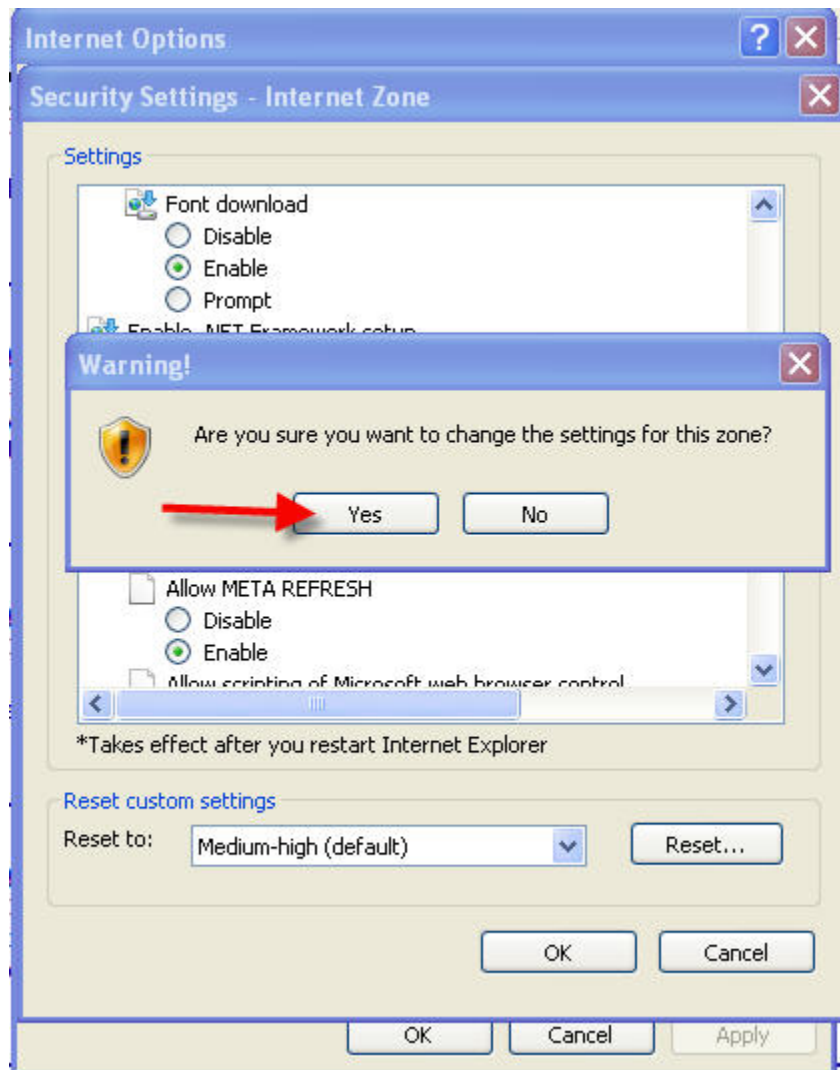

2. Scroll down to the **Miscellaneous** option in the *Security Settings dialog box*
 - a. Click the **Enable** option under **Allow data sources across domains**
 - b. Click the **OK** button at the bottom of the *Security Settings dialog box*

(See next Page)

3. Click **Yes** on the *Warning dialog box*

4. Click **OK** on the *Internet Options dialog box*

5. [**CLICK HERE**](#) to return to the *Employment Tools page on our website* and you can now see the 20 most recent jobs in the Philadelphia area.
